

## Workshop Capabilities

Explosion Technologies is designed and equipped to offer our customers the quickest possible turn around to minimise downtime of their equipment during overhaul or service.

The facility holds ISO 9001 management Systems accreditation with BSI, ANZEx accreditation for an overhaul and repair workshop for Exd equipment along with being a NATA accredited inspection body. The facility also holds a NSW Trade and Investment licence to carry out electrical overhauls for NSW underground mines and its suppliers.

We are flexible in our approach, understanding today's business environment and are committed to providing exceptional customer service.
